Accessibility Review (Guidelines: WCAG 2.0 (Level AA))
Report on known problems (1 found):

1.4 Distinguishable: Make it easier for users to see and hear content including separating foreground from background.

Success Criteria 1.4.3 Contrast (Minimum) (AA)

Check 301: The contrast between the colour of text and its background for the element is not sufficient to meet WCAG2.0 Level AA.

Repair: Use a colour contrast evaluator to determine if text and background colours provide a contrast ratio of 4.5:1 for standard text, or 3:1 for larger text. Change colour codes to produce sufficient contrast.
